DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 6, filed on March 21, 2008, with respect to claims 1-11 have been fully considered and are persuasive. The rejection of claims 1-11 has been withdrawn.

Allowable Subject Matter

2. Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-11 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image processing apparatus and method comprising means for or steps of selecting a dot pattern based on the error-corrected data and outputting the selected dot pattern as an output dot pattern, and obtaining the error data by calculating a difference between the data which indicates the output color and the color converted image data, wherein the plurality of three-dimensional tables include three-dimensional tables in correspondence with the output color.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Ushida et al (US Patent No. 6,373,990) discloses an image processing utilizing luminance-density conversion wherein a conversion circuit clamps the error produced in four-level conversion processing to the number of significant bits of the error produced at execution of the two-level conversion processing.
